Gunnebo Industries further strengthens its blocks and sheaves business in Europe

Gunnebo Industries and Certex Norway have signed an agreement transferring Certex Norway's Project Department to Gunnebo Industries. This includes all products such as sheaves, blocks, frames and beams/spreaders.

"This fits perfectly with the strategy of Gunnebo Industries. Gunnebo Industries will further strengthen its footprint in Europe towards sheaves, blocks and beams for the next years", says Arne Riple, Managing Director of Gunnebo Industries in Norway and responsible for Gunnebo Industries' Blocks & Sheaves business in Europe.

Gunnebo Industries will take over the ownership of products, such as:

- Offshore Cranes sheaves
- Launch & Recovery sheaves
- Drilling/ Riser Tension sheaves
- Standard sheaves (DNV Type Approved sheave series)
- DNV Type Approved Spreader/ Beams series
- Standard Lifting Beam series
- Rental Beams

Gunnebo Industries is an international company, active all over the world. We are global leaders in several areas within the lifting- and material handling industry for which we manufacture products such as crane blocks, wire rope sheaves, chain & lifting components, shackles and lashing products. Our products are well known and established on the market as a premium product with outstanding safety.

Gunnebo Industries is truly global, having head office in Sweden, manufacturing units in three countries and sales companies in ten countries. In addition to this we have distributing partners in more than 50 countries, making our products available in every part of the world.
